

Canon Color imageRUNNER C3380i

33 PPM Copier Printer with
 Internet fax and scan and optional fax
 MSRP: \$13,000
 Domestic Into Date: October 2006
 Manufacturing Status: New
 Mfr's Max. Monthly Duty Cycle: 120,000 impressions
 Optimum Monthly Volume: 15,000 impressions
 2007 Pick of the Year Winner

Recommended

STRENGTHS

- Color touch-screen control panel features a highly intuitive main copy screen as well as Canon's alternative Express Copy screen, which lets users program most copy jobs without having to access additional menus
- Color Universal Send standard on "1" configuration, along with advanced features such as searchable PDFs, encrypted PDFs, digital signatures and PDF High-Compression mode, which results in small color scan file sizes
- Fastest job-stream print productivity of competitive models
- Highly reliable
- Large color gamut that exhibited minimal shifting over the course of the test
- Lowest price among comparably equipped competitive models
- MEAP architecture enables customization of the control panel and integration with a wide range of document management and other types of applications

WEAKNESSES

- Fair rating for photographic images in copy mode—grainy output
- Inaccurate information on remaining paper supply displayed in driver unless user first updates the information, which is an impractical, multi-step procedure
- Lower than average photoconductor and toner yields
- Lower than average RADF and bypass tray capacities
- More cumbersome paper drawer adjustment procedures; instead of sliding a length guide, users must remove and reinsert a length guide; also, the new size is not automatically detected
